## Accelerating Innovations For Connected Businesses

**Krish CompuSoft Services (KCS)** is one of the leading providers of next-gen integrated information technology products, services as well as solutions that help transform businesses with the latest technology models in the new digital era.

The technology offerings by KCS enable intelligence and business process automation using cutting-edge information technologies and techniques to provide the enterprise with greater agility and efficiency. Our solutions are focused on digital strategies that are custom fit as per the needs of our clients.

### Vision

To enable technological convergence.

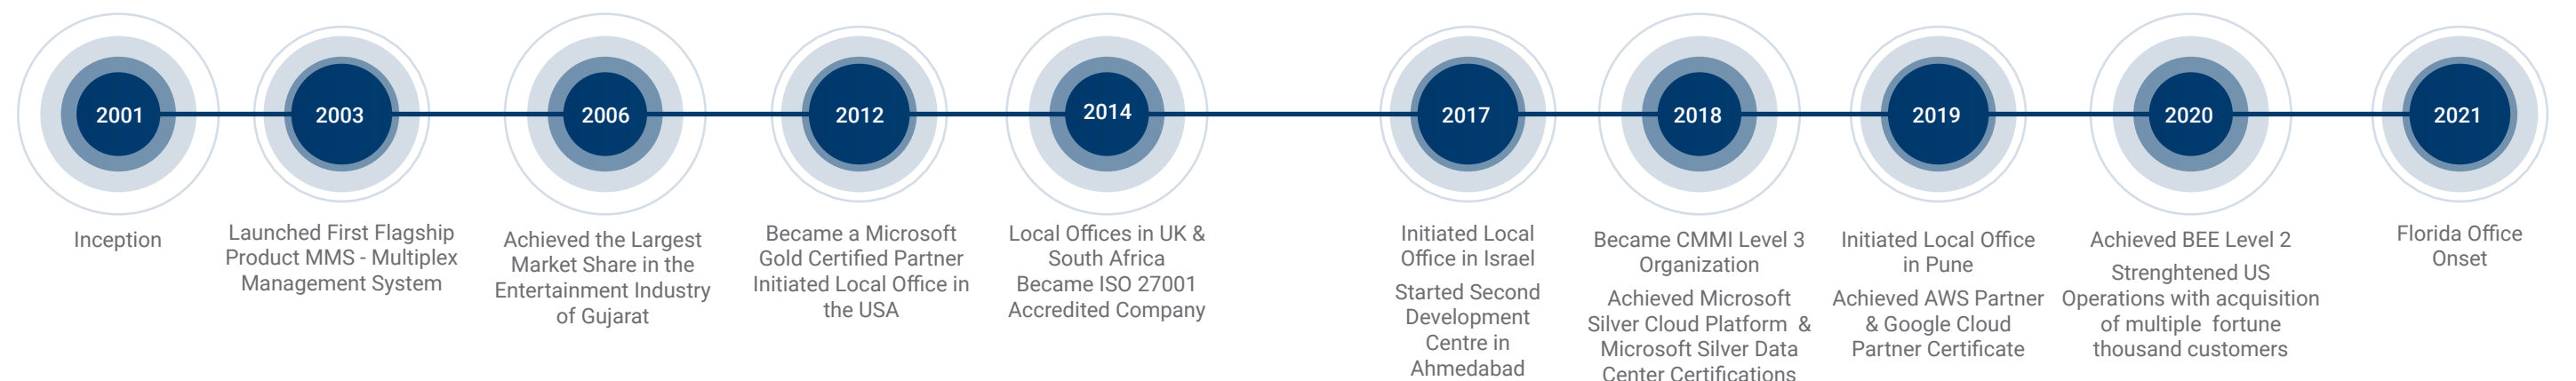

### Mission

To consistently evolve better ICT products & practices, also partner with the world's leading enterprises and help connect to digital consumers.

## Our Certified Partners

## Timeline

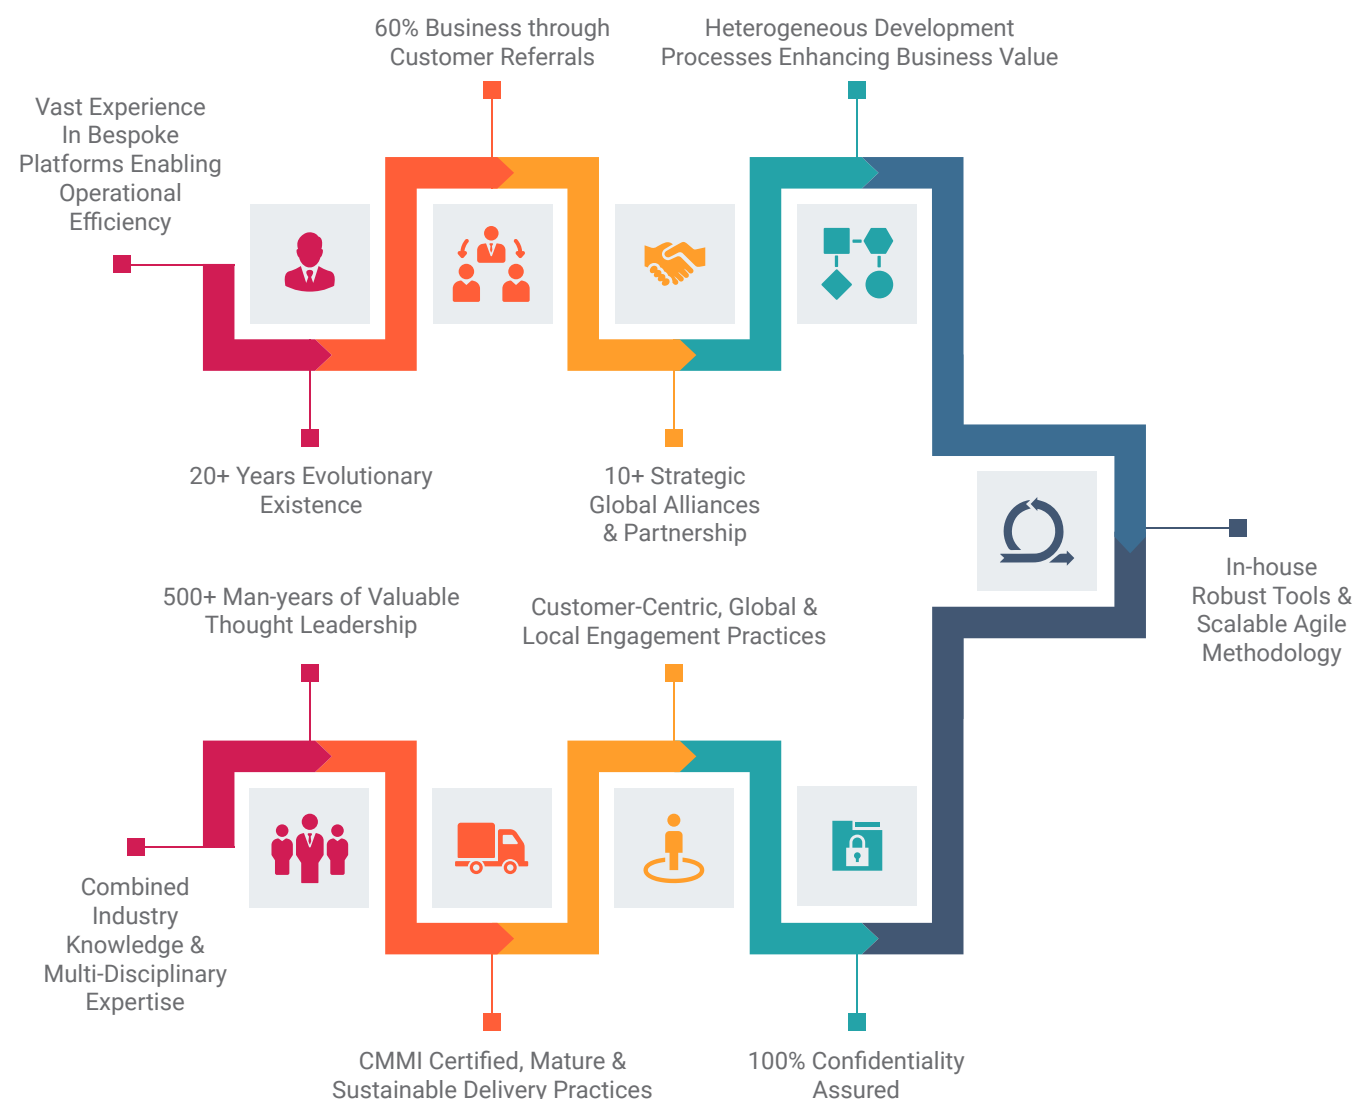

# WHY KCS?

## Delivering The Right Approach!

In this fast-paced digital landscape, the success of any organization depends entirely on its ICT systems. Over the years, KCS has built a strong foundation based on delivering the right approach for necessary processes to make technical solution successful.

One of the most outstanding achievements at KCS is the diversity of the project management practices. We focus on delivering an integrated approach along with right strategic solutions for technological enhancement. The quality as well as the ability to deliver custom solutions within a limited framework of time, resources and cost make us the first choice amongst our customers.

## Team

KCS' Team is the engine that drives to deliver technology solutions at highest levels of customer services to our clients. What makes us different is our unique selection process involving high-level selection criteria combined with tests that enable the best talent across geographies.

The KCS team is driven by basic disciplinary success factors such as unwavering dedication, commitment, a pro-active attitude and an infectious enthusiasm, that brings a spark to each and every employee of the organization. Regular and intensive training programs provide important technology updates to ensure our team is always at the forefront of the technology.

## Technical Skills

It is always said that one becomes a person just like the company they are in. At KCS, we induce best practices to analyze, test and filter the technical skills of resources we hire. We aim at high recruitment standards to achieve the best-skilled talent and drive a business objective.

## Talent Management

The company is strategically focused on ensuring various parameters of human capital. Every employee is evaluated and enhanced in the process of their journey within the company.

## Training - Skill Assessment

The culture of skill assessment at KCS starts right from induction & training. We lay stringent practices to train the resources while they work on various technical exposures in a project. Various certification programs are also offered to eligible candidates.

# PROJECT MANAGEMENT AT KCS

## Engagement Model

## Project Management Methodologies

At KCS, we follow Agile & Scrum along with DevOps as an integrated project development methodologies, empowering the client to move through the project seamlessly. Our development is characterized by dividing complex tasks into short phases, frequent reassessment, stringent quality testing, and adaptation of plans.

Our approach aids in simplifying the development processes, and ensures the final product to be highly scalable in nature. Along with our un-wavered approach, our dedicated development methodology has been the backbone of all our endeavours for quality delivery. Our methodology is seamless providing more room for client intervention/ iterations and efficient execution.

### Agile Methodologies

### DevOps Methodologies

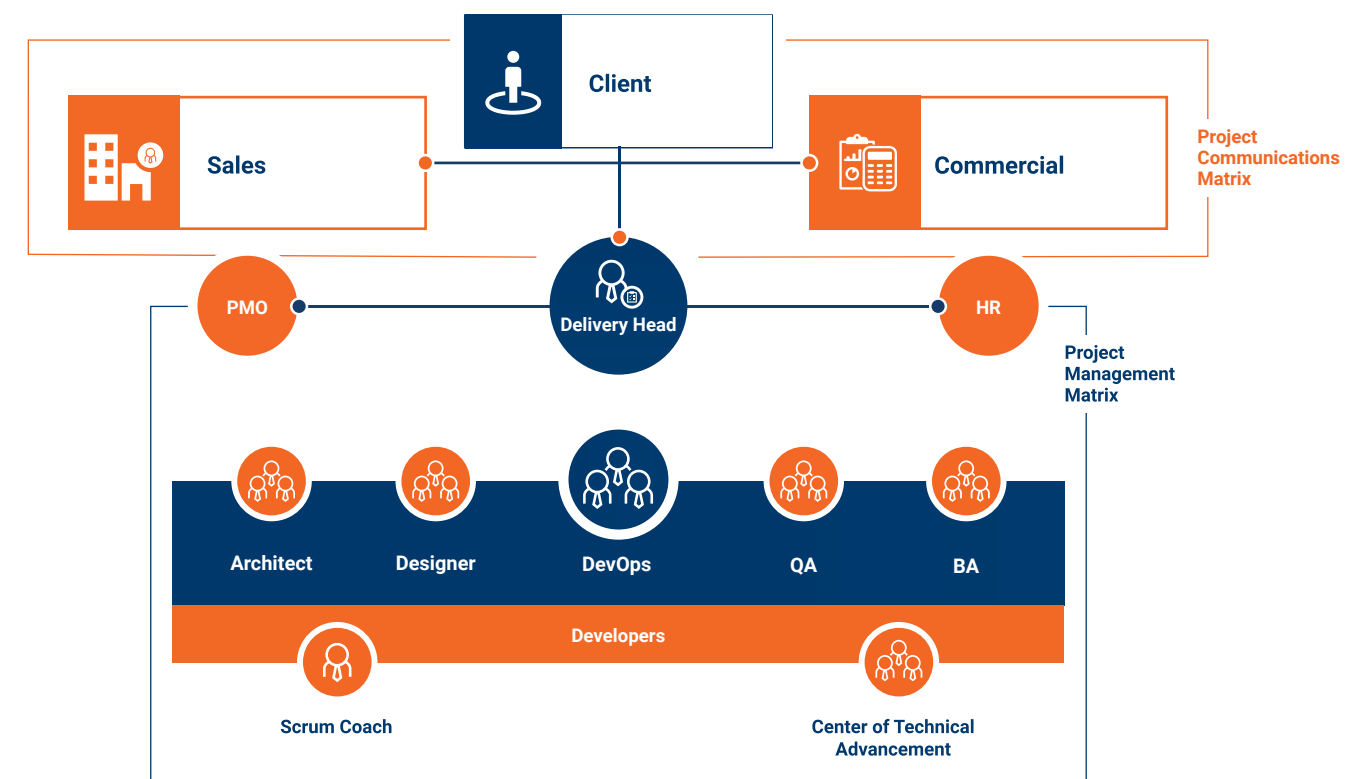

## Project Management Matrix

Our project management matrix includes the customer involvement with the delivery head for mission-critical aspects such as time estimations, project planning, iterations planning, continuous evaluation & testing, and risk management. At KCS, we maintain an open communication with our clients to ensure that the applications are built exactly the way they were expected to be.

The approach of breaking down the project into multiple time-bound iterations provide a good amount of room as well as an insight to early versions of the application in the development life cycle, which provide our clients with abundant opportunities to respond to the unexpected.

With a set of predefined roles and responsibilities, our project owners along with a DevOps team are the key to the effective project management as well as project communications at KCS.

## Project Management Tools

### Source Code Management & Versioning

- Microsoft Team Foundation Server
- SVN
- Git and GitHub

### Bug Tracking

- JIRA
- Bugzilla
- Mantis

### Project Management

- Basecamp
- Assembla
- Target Process

### Other Tools

- Jenkins (Continuous Integration)
- Google Docs (Collaboration)
- Skype, Lync and Email (Communication)

## INDUSTRIES
