e-DOCS

info@kcsitglobal.com | www.kcsitglobal.com

PRODUCT FEATURES

Environment: *Android, Eclipse*

eDocs is simply a smarter way to manage content across the extended enterprise in a way that end users love and the IT world endorses. e-Docs is simple because it provides a single, easy to use, secure document sharing solution that makes collaboration easy and bridges the gap between enterprise requirements and user needs. It is smart because it supports all the value a traditional ECM provides.

eDocs is a web based document management application that uses standards and Open Source technologies. e-Docs provides full document management capabilities including version control and file history, metadata, scanning, workflow, search, and more. It also allows the social activities around content to be used to connect people to other people, information to information, and people to information; helping to manage, more efficiently, the collective intelligence of the human resources of the company.

WHY USE E-DOCS?

- eDocs builds a highly valuable repository of corporate information assets to facilitate knowledge creation and improve business decision making. The result is:
- Improved productivity through shared practices.
- Greater cost efficiencies.
- Better customer relations, faster sales cycles.
- Shortened product time-to-market, and better decision-making.
- Reduced Storage.
- Flexible Retrieval.
- Flexible Indexing.
- Improved, faster and more flexible search.
- Controlled and Improved Document distribution.
- Improved Security.
- Disaster Recovery.
- Digital Archiving.
- Improved Regulatory Compliance.
- Document versioning.

INDUSTRY

Government organizations, Multinational companies, for all organizations with high volume of documents.

PLATFORM

- SharePoint 2013
