

Note: This case study is a draft. And is written from the fictional perspective that a client has deployed the service and we are now reporting the benefits. As more clients go live, we will update this document.

Industry: Healthcare IT

Deliverables: • Open API Architecture
• Web & Mobile App

Technology: Data Engineering & Analytics,
IOS & Android

Country: India

Challenges:

The Covid-19 virus is creating a truly unprecedented stress on national and corporate resources.

With a surge of people relocating to work in isolated quarters, management has need to understand team wellbeing in near real-time in order to correctly deploy work, resources and support. And if necessary, to report to state health or disaster authorities.

Your organization requires:

- Extreme rapid deployment
- Simple to use
- No software or app download by employees
- No conflict with any IT governance
- Clear situational visibility to all relevant managers

Solution:

Magnitude has with a completely ready to deploy solution to help you combat the epidemic with your team.

It assists your company to get organized by understanding per employee:

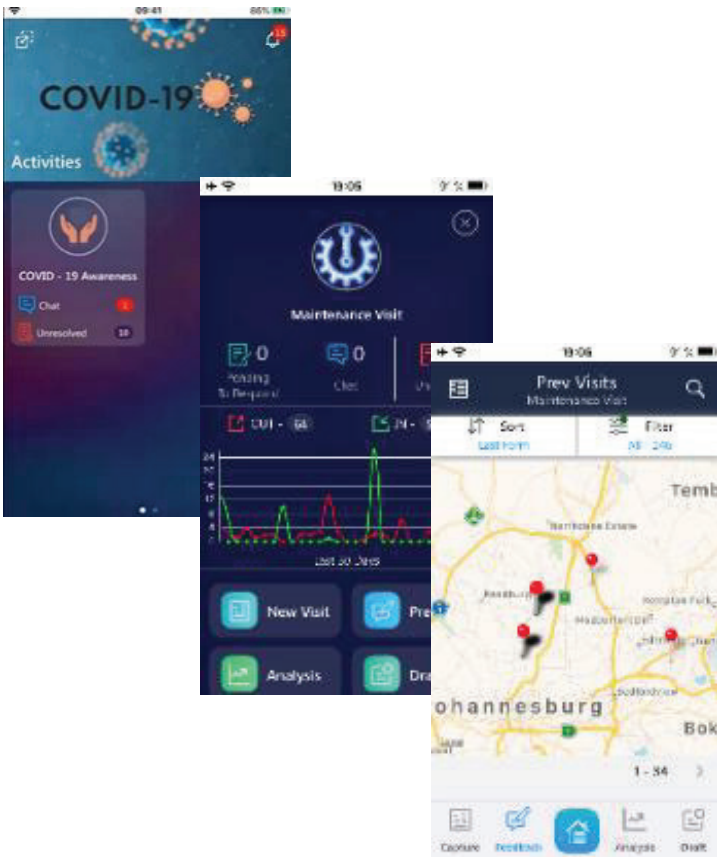

- How are our staff feeling?
- Can they continue to work?
- How can the company help?
- What advice can we provide?
- What is our company group status?
- What can be expected for our company?
- Streamline data and communication to calm the anxiety & disruption

“It is a no code platform that delivers rigour to process without breaking the entrepreneurial spirit. It delivers speed to value, real-time visibility and efficiency through any process.”

Benefits:

ROI**	VISIBILITY	TRENDS	DAYS TO DELIVER	IMMEDIATE ALERT TO KEY ISSUES

** measured in administrator time savings
