

Digital Transformation Partner of World's Largest Cricket Stadium

Case Study

Industry: Sports

Technology: WordPress, AWS, HTML

Country: India

Client Profile:

Narendra Modi Stadium is the World's Largest Stadium with a seating capacity of 1, 32,000 spectators surpassing Melbourne Cricket Ground, and is managed by Gujarat Cricket Association. It is the governing body for the development and organization of cricket in Gujarat. The association is also a permanent member of the Board of Control for Cricket in India (BCCI). The stadium has hosted several national and international cricket matches and is considered to be one of the best cricket stadiums in the world.

Challenges:

- The executives of Gujarat Cricket Association reached KCS with a requirement to revamp their existing website
- They also wanted to update the content on their previous website
- The existing website took a significant amount of time to load
- While analyzing the existing website, we found several bugs that affected the overall performance

Solution

Developers at KCS analyzed GCA's previous website and offered below listed solutions:

- Experts at KCS used the latest technologies such as HTML, CSS, Photoshop, WordPress, and AWS for revamping the website
- Our team of creative writers developed the website content from scratch
- While developing the content, our writers assured they used all the terms and glossaries associated with cricket

- Designers at KCS used the latest Photoshop to design visuals and graphics for the new GCA website
- We used HTML and CSS technology while designing for making the website highly intuitive and user-friendly
- Our programmers developed cutting-edge features for the new GCA website using the open-source content management system, WordPress
- Our developers also used built-in plugins of the WordPress platform in order to increase the overall performance of the GCA website
- We also added the 'Live Matches' section on the website to show live cricket score
- Our technical experts deployed the new GCA website over the AWS cloud to manage the heavy traffic load

KCS Approach

Using the latest technologies and industry expertise, our team developed a feature-rich website for Gujarat Cricket Association. Our in-house creative writers' team developed the website content from scratch. With the help of Photoshop, CSS, and HTML technologies, we designed a responsive and user-friendly website that fits the user's screen automatically. Our developers used the WordPress platform to develop a bug-free website. To ensure the website handles the load well, we migrated the server into the cloud.

Tech Stack

Outcomes

- The executives of Gujarat Cricket Association shared positive reviews with our work
- Our UI/UX helped the client in getting an extremely user-friendly website with easy navigation
- The cloud services helped the GCA website in handling the heavy traffic load
- Using the 'Live Matches' feature, users are now able to catch the live score of various matches
- Gujarat Cricket Association has deployed over the internet and is continuously updating it in order to give the world-class user experience
