MANAGEMENT APP  
FOR SMARTER LIVING**

## Technological Revolution for a Smart Living

The rise of technology is transforming almost every aspect of modern life. The cluster of technological advances are changing how people live, work and play. In recent times, there is an upsurge in the number of societies or townships offering a wide range of amenities and other features. Management of such large condominiums is often a challenge in today's busy lifestyle.

The tech-savvy generation usually requires smart apps which help them interact with the society smoothly. This is where Smart Town app steps in! A one-stop solution for a smart township.

"A fully automated Mobile & Web App conceptualized to reduce township complexities and provide a secure and hassle-free lifestyle through integrated services!"

## About Smart Town

### A complete automated solution for a smart township!

Tired of maintaining multiple excel sheets for member phone numbers, bills, addresses or vehicle details etc.? Not able to address society complaints or track due maintenance? Often, the managing committee has no clue of how to manage the operations smoothly! Due to lack of appropriate tools complex operations get delayed, are full of errors and are time & money consuming.

Well, it's now time to sit back and relax, as Smart Town Mobile and Web app is here for help! It is an innovative product powered by KCS, having an industry experience of over 16 years delivering a plethora of quality solutions globally. Smart Town app is specifically designed to simplify the society management and operations and is one of the easiest and the fastest way for society to function smoothly. A customized, one-stop solution provides a smarter living option by integrating various processes for committee members, residents, owners, builders, vendors and any other individual that interacts with the society.
